

Talk on Comprehensive Traffic and Transportation Study for Bangalore Metropolitan Region

Date: November 2, 2010

Venue: Bangalore

Mr. N Seshadri from the Transport Training Institute and Consultancy delivered a talk at CSTEP on Comprehensive Traffic and Transportation Study for Bangalore Metropolitan Region. His presentation gave an overview of the transportation study conducted for the BMR area in order to come up with investment proposals that would alleviate the future traffic problems of the city and the region. The solutions recommended would try to achieve the vision and goals set for the year 2030.

The presentation covered on the following:

- Presents the current traffic scenario in the study area
- Identifies the transport deficiencies
- Presents a picture of tomorrow's Bangalore in terms of demographics, growth patterns and anticipated travel characteristics
- Transportation Vision and Goals set for the year 2030
- Transportation strategies to be considered and evaluation
- Transport proposals identified in terms of long/medium/short terms
- Discusses the social issues in urban travel
