

Season's Greetings!

**From all of us at CSTEP, here's wishing you an exciting new year
and new decade.**

2019 was a momentous year at CSTEP.

We began piloting the **SNEHA** suite of solutions for anganwadi workers in Karnataka to tackle malnutrition. Look out for the state-level roll out of SNEHA in 2020.

Considering the health implications of air pollution, in April, we set up the **Centre for Air Pollution Studies (CAPS)** to build scientific evidence to inform policy decisions. In Patna, we worked with the Bihar State Pollution Control Board to prepare a **Clean Air Action Plan** for the city.

Our **Intersectionality Informed Gender Mainstreaming** project empowered women and marginalised communities in three districts of Andhra Pradesh to access sanitation facilities. Watch this [short film](#) to learn more.

In Kudgaon in Odisha, we helped build a **mini-grid** that brought electricity to the village, opening up new avenues for development.

In 2020, we will be launching **CREST (CSTEP's Solar Rooftop Evaluation Tool)** in Bengaluru, enabling individuals to estimate the rooftop photovoltaic potential of their building, in order to switch to solar energy.

In February, we will launch the **India Energy Transformation Platform (IETP)**, an independent multi-stakeholder group looking at deep decarbonising solutions for India through transformational technologies and policy recommendations.

To further encourage the use of green energy, we are giving finishing touches to **CSTEM PV**, a tool that will help industries and policymakers conduct pre-feasibility analysis for setting up utility-scale solar PV.

SAFARI

SAFARI, our system dynamics model, will help policymakers visualise various growth trajectories up to 2050, helping India achieve its developmental goals in a sustainable manner.

We would like to thank our funders:

OAK Foundation, Rohini and Nandan Nilekani Philanthropies, Bill & Melinda Gates Foundation, MacArthur Foundation, ClFF, GoodEnergies Foundation, UNDEF, UNDP, Government of Karnataka, MoEFCC, 2050 Pathways Platform, European Commission, Bloomberg Philanthropies, Hewlett Foundation, SED Fund, SHAKTI Sustainable Energy Foundation, IDRC, and European Climate Foundation.
